EXPERIENCE

Aetna Digital, Remote - Application Developer

Jun 2016 - Present

- Integral part of Aetna Digital Front-End Engineering team; building Healthcare technology solutions focused on consumer health transparency.
- Built core features in primary Web Application. Highlights included price-polling, typeahead search, geolocation, and user dashboard.
- Responsible for internal UI component library and styling library. Primary purpose of these tools was to ensure Web Client team could follow industry best practices such as responsive SPA principles, React/Redux componentization, and application state management.
- Increased Client-Side Code Coverage by approximately 30%.

FullContact, Denver, CO - Customer Success Agent

Jan 2015 - Jun 2015

- Resolved all customer issues pertaining to the FullContact API suite and user facing services.
- Worked closely with various PMs to coordinate Developer resources and time in Agile manner.

Name.com/Rightside.co, Denver, CO - Technical Agent

Aug 2012 - Jan 2015

- HTML/CSS, PHP, WHM, cPanel, DNS, FTP, TCP/IP, IMAP/SMTP/POP3 troubleshooting via phone/email.
- Authored and maintained all internal and external Knowledge Base Articles.

CODE

Sodata (solo project) <https://sodata.herokuapp.com/>

Consumption of open government API to visualize crime data for cyclists. Uses Rails, Minitest, JS, Selenium, Highcharts.js, Sendgrid, Google Geolocator, Twilio
